- Be sure to use moist growing media that is peat-based and suitable for container gardening. 1 set (3 rows) will hold approximately 2 cubic feet.
- Do not stack more than 3 sets (9 rows) of the MiniGardens without securing to a wall.
- Be sure to supply your plants with fertilizer. A water-soluble type can be applied when you water the plants, or you can use a granular fertilizer in each "pocket" when you plant.
