METHOD OF COMPUTING FINANCE CHARGES ON LINE OF CREDIT

THE FINANCE CHARGE is computed on the average daily balance of loans, determined by totaling the outstanding unpaid principal balances for each day of the billing cycle, after application of payments and credits, as received and posted, and dividing such total by the number of days in the billing cycle. The amount of the FINANCE CHARGE is computed as follows: $\text{FINANCE CHARGE} = (\text{average daily balance}) \times (\text{number of days in billing cycle}) \times (\text{daily periodic rate})$. Finance charges begin to accrue immediately when we make a loan to you.
