

## TYPICAL UNDER-COUNTER R.O. SYSTEM WITH HYDRO-PNEUMATIC STORAGE TANK

The following schematic diagram shows a combination of Aquatec's products and accessories designed to enhance the performance of a typical under-counter R.O. system using a hydro-pneumatic storage tank. Any or all products and accessories shown below can be integrated into your system. It is important that the proper size transformer and wiring harness arrangement is specified to match the combination of components required.
